

NAME: _____

DATE: _____

Introducing Multiplication

1. There are 3 soccer teams on the field. Each team has 10 players. How many soccer players are on the field altogether?

- A. 7
- B. 13
- C. 20
- D. 30

2. Write a multiplication expression that could represent the total number of dots in each drawing.

a. × =
(groups) (in each) (total)

b. × =
(rows) (columns) (total)

3. Ryan made 6 sandwiches. He used 2 slices of bread for each sandwich. How many pieces of bread did he use?

Write an equation to match this situation and solve.

$$\underline{\quad} \times \underline{\quad} = \underline{\quad}$$

4. Elena has 5 bags. Each bag has 8 rubber bands.

How many rubber bands does Elena have? Explain your work using drawings, numbers or words.

$$\begin{array}{ccc} \underline{\quad} & \times & \underline{\quad} & = & \underline{\quad} \\ \text{(groups)} & & \text{(\# in each)} & & \text{(total)} \\ & & \text{group} & & \end{array}$$

* Draw a picture

5. There are $\overset{\rightarrow}{\boxed{3 \text{ rows}}}$ Each row has $\boxed{6 \text{ crayons}}$ How many crayons are there?

a. Represent the situation with an array.

b. Represent the situation with an equation and solve.

$$\underline{\quad} \times \underline{\quad} = \underline{\quad}$$

6. Represent the diagram below with an equation and solve.

$$\begin{array}{ccc} \underline{\quad} & \times & \underline{\quad} = \underline{\quad} \\ \text{(groups)} & \text{\# in each} & \text{(total)} \\ & \text{group} & \end{array}$$

7. Jessica has 4 boxes of marbles. Each box has 7 marbles in it. She drew this tape diagram to represent her marbles. Does this diagram match the situation? Show or explain your reasoning.

Yes/No because it has _____ groups with _____ in each group and a total of _____.

8. Kiran wants to use arrays to solve $4 \times 6 = ? \times 3$.

a. Explain how he could use arrays to solve the problem.

<p><u>Draw an array for 4×6</u></p>	<p>_____ \times 3 array</p>	<p>If my total is _____ I can draw _____ rows with _____ in each column for a new total of _____.</p>
---	--	---

b. Solve for the value of the ?.

$$\begin{array}{r}
 ? \times 3 \\
 \downarrow \\
 \underline{\quad} \times 3
 \end{array}$$
